Winter is the perfect time to try out new recipes for warm and toasty beverages! OISS staffer, Nathan, is an expert Chai maker and used to make the staff a cup of chai occasionally when we were in the office - we sure do miss that.

Nathan has kindly put together a step-by-step guide [1] to teach us all how to make our own chai!

Follow his easy recipe [1] and send us photos [2] of your finished products and the spice combinations you used so we can share them out on Instagram.

Stay warm this winter!
