MakeHaven Tour & Workshop

Tuesday, November 14, 2017 - 5:30pm to 7:00pm

New Haven, CT

Do you like building and crafting cool things? Interested in electronics, 3D printing, or beer brewing? Join us for a tour of New Haven’s own “makerspace” at MakeHaven. We’ll have a guided tour of all of the awesome machines and tools, followed by a short Q&A with Chief Maker J.R. Logan. MakeHaven is in the arts district of downtown and contains an electronics workbench, wood shop, crafting area, 3D printers, a laser cutter, CNC wood mill, metal CNC, vacuum former, and a kitchen. J.R. will give us a demonstration using the laser cutter and will help everyone make your very own custom button. Bring your old magazines, catalogs, posters, or comic books to use, and you’ll leave with a personally designed button at the end of the night! Note: You must be 18 years old in order to attend. The series is open to the Yale Community, and we encourage you to come with questions! You must RSVP in order to attend.
