Campus & Home Safety

Yale is located in the heart of a vibrant urban community, with all the arts, culture, and rich diversity of experience that city life brings. With city living, it is important to take steps to stay safe, and Yale invests in significant public safety resources. Refer to the information below to find out more about Yale safety services, as well as general safety tips and resources.

Yale Safety Services

Yale Security and the Yale Police Department keep students and other community members safe. Yale has over 500 Blue Phones scattered around campus, and students can also use the LiveSafe app to turn their own cellular devices into a safety device. The Security office provides nighttime safe rides as well as walking escort services. Community members can also request Police and/or Security presence at events. The ID and Lockout Services provided by our Security Department are especially popular amongst undergraduate students.

Safety Tips

- Be aware of your surroundings and trust your instincts; they are usually right. If you feel uncomfortable or that something is wrong, leave the area.
- Keep your apartment, dorm room, bicycle and car locked.
- Don’t walk alone at night - take a friend or two along.
- Walk in the well-lit areas. When well-lit areas are not available, use the campus transportation services and security escorts by calling 432-6330 or 203-432-WALK.
- Do not use your passport as an ID. Keep it at home. (You may want to get a CT driver’s license or non-
Having your keys in your hand and be ready to quickly open the door of your car or apartment.

Fire and Carbon Monoxide Safety

Make certain your apartment or house has working smoke and carbon monoxide detectors. In addition, you will want to raise your awareness of fire prevention and how to respond in the unlikely event of a fire. Carbon Monoxide is toxic gas that is colorless, odorless and potentially fatal. Get to know the symptoms and signs of carbon monoxide leakage that results from gaseous fuels that are not completely burned - from fireplaces, gas water heaters and stoves, vehicles idling vehicles in garages, and other sources. Early symptoms are flu-like without the fever, and advanced symptoms include mental confusion, vomiting and ultimately death. Battery operated carbon monoxide detectors are the best choice for protecting your home, and all gas appliances and heating systems should have yearly safety checks by a professional. All smoke and carbon monoxide detectors should be tested every six months to make sure they are functioning properly. Establish the habit of checking them when the clocks are set forward or back each year for daylight saving time [19].

Street Safety

Can drivers be trusted to stop for pedestrians in cross walks? Is it ever okay for a bicyclist to ride on the sidewalk? How can I stay safe as a motorist, pedestrian, cyclist? Learn to be a good citizen of the street. Increase your street smarts and your level of safety by getting to know the Smart Streets website [20], developed through a partnership between the City of New Haven and Yale University. Click here for additional information on walking [21] and biking [22] in New Haven.
