

Tim Moore

Today's portrait is of Tim Moore, a PhD student from the United Kingdom who's working on his thesis which looks at the intersections between English, History, and Psychotherapy.

"I've spent my academic life in Oxford and London. Yale has been an amazing experience for me - I never had the opportunity to travel when growing-up, and so coming here was the first time I'd been in a non-European country.

It's been fascinating to witness American culture, especially in the time of Trump. My favourite thing about Yale is the architecture - it's a beautiful campus, and the imitated-Gothic style buildings made it easier to feel at home. I also love the richness and variety of the queer culture at Yale - it can't be rivaled."
