O-1 Eligibility Criteria

USCIS requires that your scholarly achievements meet at least three of the eight categories listed below. The requirement is not only to document these achievements but also be able to demonstrate your achievements are extraordinary with national and international recognition.

O-1: Three of Eight Eligibility Categories

Authorship

Published material written by others

Evidence of authorship of professional journals or other major media in the field.

Note: It is important to have journals with very high impact factors. USCIS expects publications to be part of normal academic work. One has to prove that it is ‘extraordinary with international reputation’.

Judge of others

Evidence of published material in professional or major trade publications, newspapers or other major media about the beneficiary’s work in the field.

Note: This includes not only sole reviews of one’s work but also in the form of ‘highlights/editorial/commentary’ in premier journals. Citations in book chapters can be used. Demonstrating an abundance of citations in journals or fewer ones in very high impact factored journals can also satisfy this criteria. (Science, Cell, Nature)

Original Scholarly Research Contributions

Evidence of participation either on a panel or individually, as a judge of the work of others in the same or in a field of specialization.

Note: Includes peer review for academic journals, grant proposals/conference proceedings selection committee.

Recipient of Prizes

Evidence of receipt of nationally or internationally recognized prizes or awards for excellence in the field.

Note: This category has very high standards. (e.g; Fields Medal, Pulitzer prize, MacArthur prize, etc.)

Outstanding Memberships

Evidence of original scientific, scholarly or business-related contributions of major significance in the field.

Note: This includes achievements that do not fit into any other category. Approved Patents, submissions of protein structures in national databases, letters of recommendation, invited talks at conferences, conference posters/abstracts can be used to prove ‘Original Scholarly Research’.

Evidence of publication material written by others

Note: Includes not only sole reviews of one’s work but also in the form of ‘highlights/editorial/commentary’ in premier journals. Citations in book chapters can be used. Demonstrating an abundance of citations in journals or fewer ones in very high impact factored journals can also satisfy this criteria. (Science, Cell, Nature)

Evidence of participation either on a panel or individually, as a judge of the work of others in the same or in a field of specialization.

Note: Includes peer review for academic journals, grant proposals/conference proceedings selection committee.

Evidence of receipt of nationally or internationally recognized prizes or awards for excellence in the field.

Note: This category has very high standards. (e.g; Fields Medal, Pulitzer prize, MacArthur prize, etc.)

Evidence of original scientific, scholarly or business-related contributions of major significance in the field.

Note: This includes achievements that do not fit into any other category. Approved Patents, submissions of protein structures in national databases, letters of recommendation, invited talks at conferences, conference posters/abstracts can be used to prove ‘Original Scholarly Research’.
international experts in the field.

Note: One good example would be membership in ‘National Academy of Science’. Membership based solely on level of education, years of experience, or that require annual dues do not meet the required standard.

**Employment Status**

Employment in a critical or essential capacity for organizations and establishments that have a distinguished reputation.

**Salary**

A high salary or other remuneration for services as evidenced by contracts or other reliable evidence.
