Introducing NameCoach!

Are you tired of everyone mispronouncing your name? Try NameCoach!

NameCoach gives students, scholars, and staff the ability to record their name in their own voice as they want it spoken.

For students, log in to SIS and find NameCoach under the Personal Data tab. After a recording is created, an audible icon will become visible next to your name in the online directory and in any system, that adopts NameCoach, such as class rosters in Canvas.

For scholars & staff, use this link to login and record your name [1]. This will then automatically show up in the Yale directory and you can add the link to your email signature.

Additionally, NameCoach gives everyone the option to add a phonetic spelling of your name and to display the pronouns you use.

NameCoach is entirely voluntary and only needs to be done once.
