Yale's ITS team has started a Cybersecurity Awareness Program which aims to help educate Yale students, faculty, and staff about cyber-safe behaviors that help safeguard your digital information and avoid scams.

In anticipation of their program launch in September, and as part of our planning efforts, we are hosting a virtual focus group for international students and scholars. Please join us for an afternoon break and tell us about your cybersecurity experiences and concerns - your perspective as international students will be especially helpful to our planning efforts!

**Details:**
Thursday, April 9, 3-4 PM
[Please register on Eventbrite to receive the Zoom link to join the call.](https://www.eventbrite.com/e/oiss-cybersecurity-awareness-focus-group-sip-snack-and-share-tickets-98481373439) [1]
