## Resources for Navigating U.S. Social Justice Discourse

Coming to the U.S. can be overwhelming in many ways, from speaking a different language, to different foods or weather, or immersing yourself in a new social environment. On top of navigating those changes, many of you will realize that U.S. Americans also talk about societal problems and identity in a very specific way.

We believe the best way to learn about social justice discourse is to engage with a multitude of different resources, and expose yourself to various perspectives. Below, you will find on-campus centers and communities, reading suggestions, as well as virtual resources that offer many different ways of learning about U.S. discourse on topics such as *race*, *gender*, or *immigration*.
